LED Lighting & Management Services
LEADING TECHNOLOGY SOLUTIONS

Chickasaw Network Services, LLC (CNS) provides the complete life cycle of LED lighting, control products, and management services allowing for cost-effective replacement of high cost technologies with state-of-thr-art lighting, monitoring, and controls. Our team can provide custom LED products to meet any need.

SOLID STATE LED: SUPERIOR TECHNOLOGY

Savings

- 60-80% Higher Efficiency
- 5-10x Longer Operational Life
- 60-90% Reduction in Carbon Footprint

Light Quality & Control

- Dynamic Control of Intensity, Direction, Color & Disbursement
- Remote & Automatic Control
- Emergency & Off-Grid Capability

Smart Technology

- LEDs are the Next Generation Hubs for IOT Networking
- Real-time Monitoring of Occupancy & Environment
- Integration into HVAC & Mechanical Systems

Ecologically Responsible

- No Toxic Materials
- 100% Recyclable
- Minimal Infrared & Near-Zero UV Emissions

WE ARE A TECHNOLOGY COMPANY

Every product delivered is the result of our years of expertise and experience with these technologies, led by our in-house team of engineers. Our team focuses on the full cycle of photonics, including harvesting, energy storage, light emission, networking, and control.

WE DEVELOP AND MANUFACTURE

All of our products are developed and manufactured under our own strict controls.

MADE IN THE USA: GUARANTEED

We live here and work here. CNS provides U.S. innovation, quality, and service at competitive prices. All of our products go through rigorous testing and compliance standards. We are proud to offer industry-leading guarantees.

WE ARE AHEAD OF THE CURVE

CNS produces fundamentally new market technologies, including ballast technology, off-grid solar streetlights, smart networking, controls/functionality, and many more to come.

LINE PRODUCTS AND CUSTOM SOLUTIONS

Our team not only provides a superior line of standard products, we also pride ourselves on development of fully custom solutions for a variety of difficult applications.

CUTTING EDGE TECHNOLOGY

Ballast Direct Technology allows us to use LED bulbs within existing HID and fluorescent fixtures with NO REPLACEMENT of the ballast or other core components.

DATA LOGGING AND VISUAL REPORTING
FOR SECURE MOBILE CONTROL

Control & Collect | Demand control lighting & remote monitoring
Data | Log sensor data
Extract | Package data to gain insight
Visualize | Easy to understand analysis and visuals
Deliver | Secure access and control

WORKING WITH CHICKASAW NETWORK SERVICES

When you work with us, not only are you making a decision that will ensure the success of your business venture, but you are also working with CNS to help preserve an indigenous culture. You are contributing to our mission of providing the resources needed to enhance the lives of the Chickasaw people.
