

## SECURITY SERVICES

OPTIMAL SECURITY PERFORMANCE

**Chickasaw Network Services, LLC (CNS)** integrates proven technologies with innovative system design and configuration. The systems, installed and managed by our team, experience extremely high uptime with minimal interruption. We work with leading technology and equipment providers to present the best solutions for performance optimization and value to meet specific customer and facility needs.

Our team has expertise in designing and deploying security systems in enterprise environments. Services include:

- Policy & Administrative Controls
- Access Control
- IP Video
- Intrusion Detection
- Integration with Environmental Systems

Additionally, our enterprise network design and installation expertise enhances the overall design capability allowing for one point of reference for the project.

### **Policy and Administrative Control**

CNS can manage the implementation of policy development, administrative control, and enforcement of security related activities, both physical and network based.

### **Access Control**

Our client controlled WEB interface allows for the client to change access for their building in real-time. Our solutions can enable tiered control of building access, as well as elevator and office suite access. Our team can integrate with existing climate control and lighting systems, in addition to providing access control from your cell phone.

### **Video Surveillance / IP Video**

Our team has installed video systems in support of multiple applications, including customer facing health and safety, video security, and loss prevention. Restaurant surveillance of entrances and surrounding areas is equally important. Additionally, in enterprise applications, motion sensory video is as important as health and safety. We specialize in utilizing multiple capabilities through a singular system.

### ***Intrusion Detection***

We also specializes in two different intrusion, detection, and monitoring capabilities, network based intrusion and physical intrusion.

### **Network**

Our team of network security experts design and maintain the network infrastructure to detect and prevent attempted network intrusions. We currently provide network security services to DoD customers.

### **Physical**

Our team has designed and installed multi-tiered physical security systems providing the maximum protection for your assets based on the client requirements.

### ***Integration of Network, Physical, and Environmental Systems***

Our team has integrated access and environmental systems allowing for the ability to determine physical presence with network presence.

## **ACQUISITION SERVICES**

Our team maximizes your organizations ability to meet any mission objective, including assisting with acquisition services. CNS provides sales of IT, telecommunications, security, and health science hardware and software solutions.

We specialize in the following solution areas:

- Hardware
- Software
- Initial Outfitting & Transition
- BOM Integration
- Shipping & Inventory
- Kitting & Supply Chain Management
- Enterprise Software Products
- Cyber Security Products
- Cabling Products
- Physical Security Products
- Network & Communications Products
- Furniture Fixtures and Equipment
- Durable Medical Equipment

## **FACILITY SECURITY OFFICE**

CNS holds a top secret facility clearance. Our team currently provides customers with personnel for help desk and network maintenance of client infrastructures.

## **WORKING WITH CNS**

When you work with Chickasaw Network Services, not only are you making a decision that ensures the success of your business venture, but you are also working to help preserve an indigenous culture. You are contributing to our mission of providing the resources needed to enhance the lives of the Chickasaw people.

## **Service Without Reservation**
